

# St. John's Preschool

LEARN • PLAY • GROW

Here is what our parents have to say about us . . .

We have been so happy with St. John's during all of the kids' school years, (three kids through) 😊! Thank you for offering such a well-rounded curriculum and an amazing warm environment for children."

"We knew the day would come when our youngest would move on to K. We couldn't have asked for a better program, better teachers, better events and better directors. It was an amazing experience! We will miss St. John's!"

"My husband and I thank God that we found this preschool for our 3 years old daughter, and we are so thankful for all the hard work that the directors and teachers have been doing for the kids. May God continue to bless you and your family especially this holiday season."

"You foster such a loving and welcoming environment for our daughter! To drop her off, and know that she is in the best hands is such a blessing."

"I was a little nervous about switching preschools. The teachers do a great job of making everyone feel welcome. My daughter felt very comfortable from the beginning. I was very happy with my choice to go to St. John's and I feel that my daughter has learned a lot this year. She couldn't wait each day to get to school! I think the program is very good, and the teachers are great! I would highly recommend St. John's."

"In the year and half our daughter has been at St. John's, she has transformed into an amazing little girl who has learned to spell her name, count to 100, identify each letter and where it is in the alphabet, create beautiful art that she calls "The Spirit of God," and to speak of the Holy Father and how much he loves us all. The teachers at St. John's are talented, kind, patient, thorough, well qualified and truly giving of their love to our children."

"St. John's has helped our son develop an excitement for learning, confidence in meeting new friends, and sparked his creativity that we have enjoyed watching through his journey through preschool! Thank you for fostering that environment."
